Can Software for Social Good be a Bright Spot for Silicon Valley? 

YES!

Tech companies know software and data  
The social sector knows the needs of people it serves

SOFTWARE FOR SOCIAL GOOD

Software for social good can help address some big problems

DNA  
1 in 7 people live in poverty in the U.S.

2.4 MILLION unfilled STEM jobs in the U.S.

Gavel  
1000+ human rights defenders threatened in 2016

Book  
5% of children with disabilities complete primary school worldwide

Is Silicon Valley up to the software for social good challenge? 

Here’s how Benetech is doing its part.

1. Weave a stronger social safety net that catches everyone who needs it
2. Give people with disabilities a voice in their future
3. Unlock STEM education for all
4. Use social media investigations to achieve international criminal justice
5. Give all learners equal access to education
6. Empower human rights defenders to pursue truth and justice
7. Provide all students with personalized learning experiences
