Benetech Accessibility Services for Education (BASE)

Ensuring equal access for students with disabilities can be a complex and overwhelming task. Whether it's inaccessible websites, outdated policies, or a lack of awareness, these barriers prevent many learners from fully engaging with your programs and services. BASE can help you bridge the gap, so every student has the tools they need to succeed.

Benetech

Make your organization accessible to all learners

Benetech Accessibility Services for Education (BASE) is designed to dramatically level up your educational organization's accessibility capacity so that all students can unleash their learning potential.

Our comprehensive suite of services helps educational entities by assessing current practices, identifying improvement areas, providing staff training and resources, and creating actionable plans that ensure equitable access and inclusion for all learners.

Our services

- **Digital Accessibility Assessment:** Review of your organization's websites to ensure they meet industry accessibility standards.

- **Accessibility Maturity Model:** Develop an informative framework to help organizations assess and improve accessibility policies, processes, and outcomes.

- **Professional Development:** Support for your team's growth and learning, including creating accessible documents, using built-in accessibility features, and Universal Design for Learning.
